Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/585,550	Applicant(s) ILIAS ET AL.	
	Examiner Peter R. Brown	Art Unit 3636	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 11-18 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on December 28, 2009.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, there is insufficient structure or means set forth to provide the interconnection between the seat and frame such that the seat is collapsible to a vertical position.

In line 7, the description of the backrest “which belongs to the ..sitting part”, is confusing and unclear.

In line 8, there is no function or purpose attributed to the "spring element".

In line 9, “swivelling connected” is awkward, and should be changed to “pivotally connected” or the like.

The two “lever arms” should be positively interconnected and located relative to one another.

In claims 3 and 4, the seat separators should be set forth as having supporting “legs” rather than “feet”, for clarity.

In claim 5, there is insufficient description of the “arm”, in terms of its structure, purpose and function.

In claim 9, the “readjustment device”, has not been sufficiently defined in terms of its structure and interconnection to the other elements.

In claim 10, the “spring element” should be set forth as a “second” spring element, for clarity.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10, so far as definite, are rejected under 35 U.S.C. 102(b) as being anticipated by Muin et al.

Figures 1-5 show structure as claimed, including a plurality of seat separators 32, backrests 20 and seats 10, wherein the backrests are inclinable via spring 60 and lever arms 55,62, the seats are collapsible to a vertical position via spring assembly 61 or “readjustment device”. The seat frame includes cross beam support 31, and an arm 35 which supports the spring device 60.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Monroe, Morgan, Sherman, Simpson, Colasanti, Schumacher et al, Romca et al, Williamson, and Alter show various features of the invention.
